ILLUMINATION ON THE MODEL TYPE:

Dimming function code Y could be defined as A~D. Each letter represents one function, as below:

- Letter A: No dimming function
- Letter B: Built-in 3 in 1 dimming function via signal cable
- Letter C: wireless programmable dimming function
- Letter D: wireless programmable dimming function + 3 in 1 dimming function via signal calbe

DIMMING FUNCTION DESCRIPTION (optional)

■ 3 in 1 dimming function

- ◆ Built-in 3 in 1 dimming function, control the output current via connecting the control signal cable to resistor, PWM signal or DC voltage (0~10V) separately
- ◆ The minimum output current limited to 10% of the maximum output current, and the minimum output power should not be less than 20W.
- ◆ The curve of output current versus the control signal of resistor/PWM/DC voltage separately as below:

■ Wireless Programming Dimming Function:

- ◆ Using the infrared remote controller to set up the initial output current;
- ◆ Using computer to Change the initial setup via the programmer provided by Brightway. All of the output current, timing controlled dimming function, and the voltage level (5V or 10V) of PWM signal could be re-defined.
- ◆ The timing controlled dimming function could be defined in manufactory, or customer program it with the programmer provided by wintek. The product supports 5 dimming stages at most to be defined.
